Flail mower

Weed brush

Snow sweeper

Tipping shovel

Lawn edger

Rotary/mulch mower 1200 with
grass collector

Snow V-plough and salt and sand spreader

Rotary/mulch mower 1500

Unmatched versatility

One machine - 18 functions

Thanks to its many attachments, the City Ranger 2260 can handle many tasks. Be it sweeping, winter chores, mowing or other tasks: Attachments can be changed entirely without the need for tools by turning the handle connecting the attachments to the front and rear. This allows for quick switches between different tasks and purposes - and it also saves time and ensures easy operation. Its compact design and articulated steering make it easy to get around even in difficult and tight conditions. At the same time, the excellent visibility as well as the ergonomic and intuitive operation guarantee simple functioning which is crucial for the efficiency of the machine and the safety of the operator.

Find more information on City Ranger 2260 and its applications at www.egholm.eu.

Change of attachments - no tools required.
